EMERGING METHODS FOR EARLY DETECTION OF FOREST FIRE

hare your feedback

Determines
whether the
forest fire takes
place based on
the dataset
given as input

To create an application that predicts the forest fire using various ML Algorithms

Says Thinks

Does Feels

provides csv
files as input
and predict the
output(on fire or
not) using ML
algorithms

The project can be improvized further by giving input as image/video instead of dataset.It is done by object detection.
